

Evolution

Give your OSR the best possible start

HE-VA

Distributed by **OPICO**

Establishment

Whilst oilseed rape is a profitable break crop its establishment is becoming increasingly difficult with flea beetle hammering crops at cotyledon stage, blackgrass issues and pressure from slugs.

The Evolution combats all of the challenges to good OSR establishment. Available in 3m mounted, 4m & 5m trailed working widths, the Evolution incorporates all the technical developments that HE-VA and OPICO have brought to the subsoiler seeding market over the past 10 years.

The Evolution is designed to ensure the crop is given the best possible start.

- Optional Nitro-Band or Nitro-Jet – band granular or liquid fertiliser placement to give the young plant a boost.

FEATURES

DISC OPENERS

Slices through any surface debris and soil thereby reducing the burst effect from the following leg. Lower disturbance prevents/reduces the germination of grass weeds.

120mm wide

LEGS & POINTS

Stealth low disturbance medium depth subsoiling legs and points alleviate compaction and encourage OSR rooting.

V-PROFILE ROLLER

Reconsolidates and creates micro-tilth around the soil opening.

TWIN MULTI-SEEDER

Precise OSR seed and slug pellet metering through a single control box. Accurately applies seed, slug pellets or companion crops.

ACCU-DISC

Double disc coulters for exact, consistent seed depth and consolidation, creating a more even germination.

See separate Stealth brochure for more information on disc openers, legs and points and V profile roller

See separate Accu-Disc data sheet for more information.

STANDARD EVOLUTION SPECIFICATIONS

Model	Description	Transport Width	Protection	No. of Legs	HP Required
3m	Mounted Rigid	3m	Shearbolt	7	170+
3m	Mounted Rigid	3m	Hydraulic Reset	7	170+
4m	Trailed Folding	2.5m	Shearbolt	9	250+
4m	Trailed Folding	2.5m	Hydraulic Reset	9	250+
5m	Trailed Folding	2.5m	Shearbolt	11	300+
5m	Trailed Folding	2.5m	Hydraulic Reset	11	300+

Liquid or granular fertiliser kit to suit requirements
NB: Leg spacing to be specified on order
