DURABILITY

All HE-VA legs and points are designed to provide optimum working characteristics of each machine and manufactured to the latest stringent quality standards.

120mm Stealth LD Point Tungsten nose

- High quality carbon cast steel providing impact resistance with durability
- Chamfered shin reducing soil burst
- Rear convex skirt increasing leg protection and working life
- Single bolt fixing for reduced downtime and protected by the wing design
- Specific wing angle provides exacting lift and shatter without boiling
- High density Tungsten Carbide maintaining a perfect cutting angle at the point

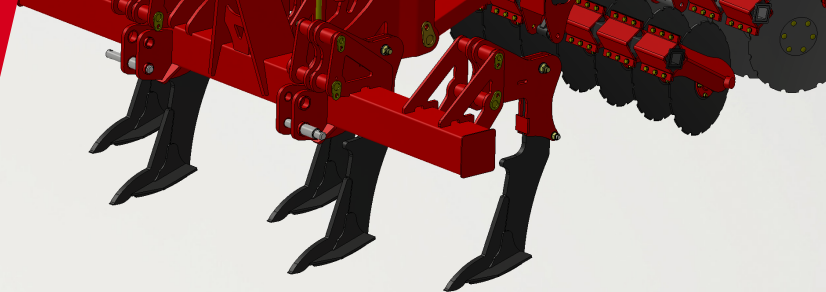

For those looking to further increase longevity and decreased downtime, points can be specified with additional tungsten on the wings.
